

Business Member Spotlight
McKenzie Roofing

Since 1995, McKenzie Roofing has been serving Eugene, Springfield, and the McKenzie valley with high-quality roofing services. Both owners were born and raised in the McKenzie community and have a strong community tie, as well as firsthand knowledge of the unique needs of our environment. With expertise in residential, commercial, and industrial roofing systems, we can take care of all your roofing needs. We offer all in house labor, roofers that are trained and certified by us. When you hire McKenzie Roofing, you are getting a true home-grown family run business, not a private equity group with subcontractors. We are proud that we have served the community for 31 years with honesty, integrity and true craftmanship while providing for our 50+ employee families. Whether you're looking for composition shingles, standing seam metal, or membrane system roofs, new construction, re-roofs or repairs, McKenzie Roofing can take care of your roofing needs! Thank you for supporting us, and our local businesses in the community!
